

PROFILE

Hello,

I am creative and hardworking. I have always been fascinated by computers and the human mind. I have enjoyed building IOT (microcontrollers and sensors) based model and products, learning programming and wood/material works. Web design/development is my present focus and I want to continue exploring new things like AI (artificial intelligence), AR (augmented reality) and organic farming in the future.

EDUCATION

Bachelor of Vocation -
Creative coding

2004 - 2016

School - Parikrma Humanity Foundation

2016-2019

college - Srishti Institute of Art, Design
and Technology

SKILLS

- Frontend web development
- Material craft and art
- IOT (Arduino and sensors)
- CAD (3D modelling)
- Dance
